

HIER FEHLST DU!

Junior software engineer in the media environment (m/f/d) - immediate start -

We are looking for **YOU!** We're **MoovIT** – a friendly team of 37 people from the fields of **video and IT**, working at Schanzenstrasse 29 in Cologne's Mülheim district. We specialise in **developing and supporting workflows** relating to **post-production, news and archiving** at the interface of video and IT. We help businesses across multiple industries with innovative solutions for **web-to-video, localisation, remote editing and video hosting**. Our customers include **broadcasters, production houses, agencies and sports organisers**.

When you work with us, you won't just sit at your desk. You'll also get the opportunity to visit our customers on site to develop solutions together, or to support them at events such as the **World Cup or European Championship**.

Your **work-life balance** is important to us! That's why we offer you flexible working hours, and a relaxed working atmosphere with a great team spirit.

As part of our team, you will:

- Play an active role in both backend and frontend development
- Support the installation of systems at customer sites
- Support us in developing workflows together with our customers
- Work with teams across functions and departments to ensure quality throughout the software development lifecycle

**Here's what we're looking for from you:**

- More important to us than your academic qualifications is your ability to support us!
- You may have an apprenticeship as an IT specialist in application development, comparable training or a degree in computer science. Or perhaps you're looking to switch careers, ideally from the media or post-production environments.
- You love working on exciting technical products and projects.
- You have some basic experience in the field of object-oriented development, applications, multi-layer systems, web applications and state-of-the-art services.
- You have good knowledge of Java or a comparable programming language.
- You have good knowledge of web technologies such as HTML5, JavaScript and CSS.
- You have an analytical mind and a strong ability to propose solutions to problems.
- You have an affinity for new technologies and are motivated to adapt and evolve them.
- While you can work independently (you may even be self-employed), you're looking for a responsible and team-oriented way of working.
- You are confident in dealing with Microsoft and Unix operating systems.
- You have good knowledge of German OR English (at least B1).

Does this sound like you? If so, come and join us!**Here's what you can expect from MoovIT:**

- Look forward to an open corporate culture with no dress code, flat hierarchies, and short, rapid decision-making processes in the dynamic environment of the media industry.
- We promote your professional and personal development through regular internal and external training programs.
- We want to help you maintain a healthy work-life balance! We offer 30 vacation days, a flexible 'flexitime' model, home office, mobile working and the possibility to take a sabbatical. A four-day week is also possible with us.
- You'll have a varied and exciting area of responsibility, with the opportunity to contribute your own ideas.
- Your catering will be taken care of – including free drinks and fruit baskets.
- You'll receive a JobTicket for public transport, a JobRad bicycle, and an above-average allowance for company pension schemes.

Your application:

If you like the sound of working with us, we'd love for you to get in touch!

Please send your application documents to the following address, email it to [bewerbung\(at\)moovit.de](mailto:bewerbung(at)moovit.de) or simply give us a call.
